BENEFON Trackbox

One for all

in risk management

Benefon Trackbox is a unique telematics solution for securing, guiding and managing a company's assets

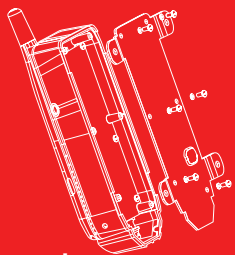

COUNTLESS OPPORTUNITIES

Benefon Trackbox can be used anywhere there is GSM network coverage, to manage valuable assets in different lines of businesses including everything from construction to car and boat rentals.

Benefon Trackbox can be used to protect any work related machinery, equipment or other property by tracking their exact location and when necessary, helping to recover stolen property.

In the transportation business Benefon Trackbox can help in the tracking and management of vehicles, freight and staff. The information Benefon Trackbox records can be analysed and used to help improve delivery times and cut costs.

Benefon Trackbox is a unique telematics solution for securing, guiding and managing a company's assets, personnel and business. Based on GPS technology the Trackbox can be used in a variety of different ways depending on client needs.

CUSTOMISABLE M2M SOLUTIONS

Several different functions and applications can be added to Benefon Trackbox depending on the client's needs. A wide variety of different solutions are available in one compact package.

Emergency and listen-in functions secure equipment and staff. Emergency information can be delivered quickly, ensuring help is sent as soon as possible to the right location.

By sending real-time information the tracking function helps optimise equipment utilisation and makes deliveries easier. The movement of vehicles can also be monitored on pre-selected routes and areas.

Peripheral applications enable Benefon Trackbox to transfer information to a back-end application. In addition to location Benefon Trackbox can track other information as well. For example, freight space temperature, the amount of liquid in a tank or even open doors. The recovery of stolen vehicles and vehicle immobilising is easier with the help of Benefon Trackbox.

USAGE

- Asset management and tracking
- Theft recovery
- Mobile fleet management
- Fleet optimisation and guidance
- M2M communication

SYSTEM FUNCTIONS

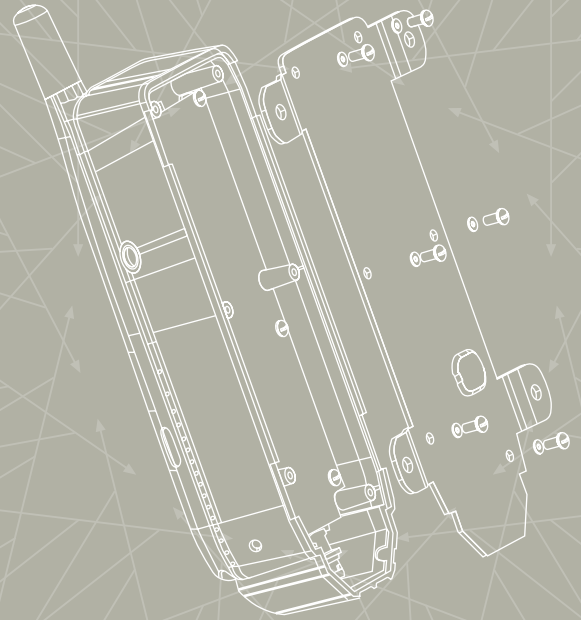

- Emergency
- Listen-in
- Area tracking
- Way point tracking

DEVICE

- In-vehicle installation
- In-built charger
- Back-up battery
- Compact design

I/O FUNCTIONS

- Specific commands
- Recording memory
- Digital and analogue inputs
- Digital outputs
